

# You're invited to an "insider" view of leading innovative construction techniques for today's home building market!

Join us for a special 2-day event presenting the PowerHouse Home... now completely finished...showcasing advanced energy-efficient building technologies that will lower your customers' utility bills and increase the value and quality of your products.

The PowerHouse is expected to use less than half the energy of a standard code-compliant home. Talk to experts and see how you can increase the performance, comfort and durability of your new homes.

Improve energy efficiency and qualify for the \$2,000  
ENERGY TAX CREDIT available in 2006.

**When:** Friday and Saturday, June 23 & 24, 2006
